Education

Symbiosis University of Applied Sciences — Indore, India
B.Tech. Computer Science & Information Technology — Jul 2024 – Jul 2028
CGPA: 8.94/10.0 (first four semesters) · Coursework: Data Structures, Design and Analysis of Algorithms, Operating Systems, DBMS, Machine Learning

Experience

Machine Learning Engineer Intern — Jun 2026 – Jul 2026
Samanviti, Bengaluru (Remote)

- Independently developed InboxIQ, an ML-based Gmail triage system using Gmail API and OAuth 2.0, processing 5,888 emails across 8 categories.
- Compared TF-IDF + LinearSVC (86.8% accuracy, 0.79 macro F1, 0.12 ms latency) with fine-tuned DistilBERT (87.5%, 0.78 macro F1, 1.6 ms). Zero-shot Llama 3.2 reached 94% accuracy and 0.93 macro F1 on a separate 50-email sample, so it is not directly comparable.
- Built a FastAPI backend, PostgreSQL data layer and Streamlit dashboard with a correction-based model retraining workflow.

Full Stack Developer Intern — May 2025 – Jul 2025
I-SoftZone, Indore

- Built and deployed a full-stack ERP system with React.js, Node.js, Express.js and MySQL, including REST APIs for GST billing, invoice generation and POS receipt printing.
- Optimised MySQL queries and backend services for concurrent branch operations.
- Implemented real-time inventory synchronisation across 3 retail branches, removing manual stock reconciliation.
- Wrote multi-tenant transaction handling with per-branch MySQL connection pooling and atomic writes across sales, line items and ledger.

Projects

Prepwise – AI Interview Platform — 2026
Next.js, FastAPI, Supabase, FAISS, Groq API

- Built an AI mock-interview platform that grounds questions in a user's own syllabus through a RAG pipeline (PyMuPDF, all-MiniLM-L6-v2, FAISS, Llama 3.3 70B via Groq).
- Designed 4 interview modes (Technical, HR, System Design, Subject-specific) with live 0–10 scoring and per-session weak-topic tracking.

AC-PINN – Adaptive Curriculum Physics-Informed Neural Networks — 2026
PyTorch, NumPy, SciPy

- Implemented curriculum-based collocation sampling and adaptive loss weighting for PINNs solving 4 PDEs (Burgers, Heat, Wave and Allen-Cahn) under sparse and noisy data.
- Built finite-difference baselines (Crank–Nicolson, Leapfrog, IMEX) and ran ablation studies on how each component affects solver accuracy.

NeuralVoid – Offline AI Learning Companion — 2025
Flutter, Dart, Gemma 3 1B, FAISS, SentenceTransformers, ML Kit

- Built an offline tutoring app with on-device Gemma 3 1B inference, an NCERT-based RAG pipeline and Hindi-English translation through Google ML Kit.

ClinicGo – Smart Clinic Management System — 2025
.NET 10, React.js, Java, PostgreSQL, SignalR

- Built a .NET REST API (9 controllers, 41 endpoints, 10-entity PostgreSQL schema) with JWT authentication and SignalR chat, serving 2 Android apps and a React dashboard in a team of 3.
- Implemented a SignalR hub for real-time, appointment-scoped chat with persisted message history.

Leadership

CODEC Coding Club, SUAS – President — 2026 – Present
IEEE SUAS Student Branch – Membership Development Chair — 2026 – Present
Hult Prize @ SUAS – Deputy Campus Director — 2026 – Present
TEDxSUAS Women – Executive Producer — 2026 – Present
ACM Student Chapter, SUAS – Former Chairperson — 2025 – 2026
IEEE Computer Society, SUAS – Secretary — 2025 – 2026
Synapse Magazine, SUAS – Design Associate — 2025 – Present

Led organising teams for VisionX and TechKutumb 4.0 & 5.0; co-led 10–15 technical sessions for nearly 330 first-year students; contributed to six editions of ICTBIG, WorldSUAS and IDBA.

Technical Skills

Languages:	Python, Java, JavaScript, TypeScript, C#, SQL
AI / ML:	PyTorch, scikit-learn, RAG, FAISS, SentenceTransformers, LLM APIs
Web / Mobile:	React.js, Next.js, Tailwind CSS, Node.js, FastAPI, .NET, Flutter, Java (Android)
Databases:	MySQL, PostgreSQL, Supabase, SQLite, Firebase
Tools:	Git, Postman, Figma

Awards

Smart India Hackathon 2025, Internal Round Winner · Symbiosis Skill Hackathon 2026, Top 13 Finalist and Consolation Prize · MSME Idea Hackathon 6.0, College-Selected Idea (ClinicGo)
